

How to Create a New Free Email Account with Proton Mail

Time needed: 5 minutes

1. Go to the [Proton Account signup page](#) in a web browser on your computer.
2. In the Username box, enter the username you want to use for your free email address.
3. Choose which domain you would like to use for your address: @proton.me or @protonmail.com (@proton.me is selected by default).
4. In the Password box, enter a password at least eight characters long and type the password in again to confirm.
5. Click Create account.

By creating a Proton account, you agree to our [terms and conditions](#)

6. Choose **Continue with Free** to create your free email account

Free

The no-cost starter account designed to empower everyone with privacy by default.

0 € /month*

Continue with Free

Up to 1 GB storage

1 email address

3 folders and labels

150 messages per day

* No credit card required.

7. If you're asked to confirm you're human, tick the I am human box and follow the instructions. Or you can choose Email or SMS to verify you're human that way.
8. Enter an optional display name. This is what people will see when you send them an email. Click **Next**.
9. Enter an optional email address or phone number that you can use to recover your account if you ever forget or lose your password.

Save contact details

Save your email address or phone number to use for verification if you need to reset your account.
